### REASONS FOR ALLOWANCE

Claims 1-2, 5-17, 19-22 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach the specific combination of elements as claimed. In particular the prior art fails to teach *inter alia* a portable organizing method and system including a display, a hand-held housing and includes the feature of allowing a user to access an assignment record on an institutional system, wherein the assignment is characterized by an estimated duration or completion date; and configured to receive a user schedule constraint; and an agent configured to create a calendar entry for the accessed assignment record in response to the user schedule constraint and the estimated duration or completion date; and further comprising a sensor responsive to a unique identifying signal from an identification tag attachable to an article and operable to emit said unique identifying signal; wherein the agent is further configured to initiate a notification to the user in response to the unique identifying signal. The closest prior art of record does not teach or fairly suggest this feature in the combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Schenker et al. (USPN 6,633,223) - disclose a system for tracking student attendance and monitoring possession and use of institutional inventory.
- Kaufman et al. (USPN 6,774,811) – disclose a system including a client device that tracks tags attached to articles to determine who has possession of the articles.
- Kashima (USPN 6,711,378) – discloses an online education course with customized course scheduling.

Art Unit: 3713

- Blants (USPN 6,732,080) – discloses a system and method for providing personal calendar services.
- Ford et al. (USPN 6,549,939) discloses a proactive calendar notification agent.
- Francis et al. (FR002677148A1) – disclose a process of detecting articles.
